

## ICE-MAKER WATER FILTER

Model:

**AP717**

Applications:

Choice of:

**Sediment/ Rust<sup>1</sup>**

**Taste/ Odor**

**Scale<sup>1</sup>**

<sup>1</sup>not tested or certified by NSF

**AP717**

- Triple Action Filtration Process
- “In-line” design for fast & easy installation
- 1/4” tube push-in fitting
- 0.5 GPM
- Install on cold water line only

Made from FDA<sup>2</sup>  
CFR-21 and/or NSF  
Compliant Materials

<sup>2</sup>Food and Drug Administration of USA

System tested and certified by NSF International against Standard 42 for the reduction of Chlorine taste and odor.

Capacity: 1500 gal. (5678 lit.)

### Features:

- ▶ Triple-action filtration and treatment system
- ▶ Pressure tested, high impact plastic design
- ▶ Specially formulated high adsorption activated carbon media
- ▶ Premium Graded-Density depth prefilter
- ▶ Proprietary scale and corrosion inhibition system
- ▶ System tested and certified by NSF International
- ▶ Manufactured from FDA CFR-21 and/or NSF compliant materials
- ▶ One Year Limited Warranty

### Benefits:

- ▶ Provides sparkling clear ice cubes, fresh tasting water, coffee and beverages; long life sediment/rust<sup>3</sup> performance effective taste odor reduction, and scale/corrosion<sup>3</sup> protection in one filter unit
- ▶ Protection against stressful conditions such as water hammer
- ▶ For long cartridge life and reduction of unwanted chlorine and taste odor
- ▶ For higher sediment removal efficiency and longer cartridge life
- ▶ Helps protect equipment and ice makers against scale build-up and the damaging effects of corrosion; reducing maintenance costs
- ▶ Verification of system design and performance by recognized third party certifier
- ▶ Suitable for drinking and cooking water and all food applications
- ▶ Engineered system design provides long-term operation Quality factory support and service available

<sup>3</sup>not tested or certified by NSF

***The Choice of the Professional Plumber***

## Specifications

Model No.	Inlet/Outlet Size	Dimensions		Approx. Weight	Maximum Flow Rate	Capacity	Maximum Water Temp.	Maximum Water Pressure	Standard Replacement CTG. No.	Replacement CTG. Qty.	Degree of Filtration
		Height	Maximum Diameter								
AP717	1/4" Tube Push-In Fitting	8.4" (21.3 cm)	2.3" (5.8 cm)	1.0 lbs (0.5 kg)	0.5 gpm (1.9 lpm)	1,500 gal. (5,678 lit.)	100°F (38°C)	125 psi (862 kPa)	AP717	1	5 micron nominal*

**IMPORTANT:** Cartridges should be replaced every 4 - 6 months or 1,500 gallons (5,678 liters)

\* not tested or certified by NSF

## Premium Performance Filtration

### Triple Action Filtering Process

The first stage of filtration employs the exclusive **Aqua-Pure®** Graded-Density pre-filter made from an exclusive process using pure white cellulose fibers. As water enters the filter it is forced through pores that become increasingly smaller to help remove even microscopic particles of sediment, rust, and sediment. This unique process offers superior filtration performance.

- **Longer Life**
- **Higher Efficiency**

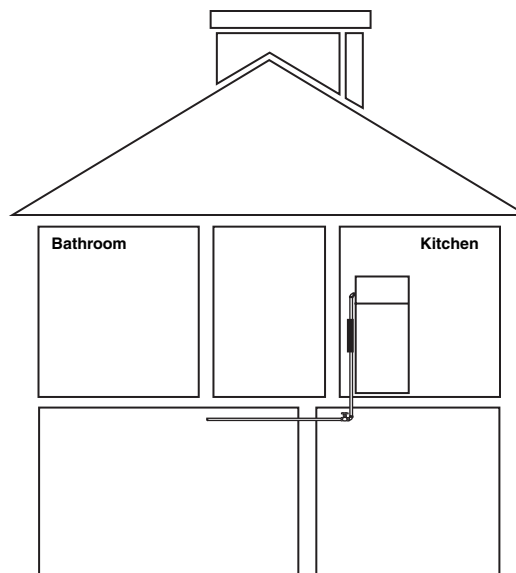

After water passes through the Graded-Density pre-filter, the water enters a deep bed of specially formulated Activated Carbon. In this stage the water comes into contact with hundreds of thousands of activated sites which effectively reduce unwanted tastes, odors, and chlorine.

- **Chlorine Reduction to 1,500 Gallons (5,678 Liters)**
- **Sparkling Clean, Great Tasting Water**

Stage 3 incorporates the unique **Aqua-Pure** Scale Stopper crystals to effectively inhibit scale and corrosion. The Scale Stopper crystals utilize two mechanisms to help manage tough problems: one that inhibits scale from forming and one that treats the surface of the piping to help prevent the negative effects of hard water scaling or corrosive water.

- **Helps Protect Appliances and Plumbing Surfaces**
- **Improves Water Heater Efficiency**

## Easy Installation

Your new **Aqua-Pure** Water Filter installs on the cold water line feeding the ice-maker. Complete installation instructions included for your convenience.

Tools required for installation:

- Tube Cutter
- Adjustable Wrench
- PTFE tape
- Appropriate Pipe Fittings

**IMPORTANT:** Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

### Experience • Innovative Technology • Leadership

CUNO Incorporated, manufacturer of **Aqua-Pure** water filters, has been designing and producing premium performance water filtration systems for over 90 years. CUNO is a world leader in fluid filtration for major restaurant chains, food and beverage processors, cruise ships, hospitals, and pharmaceutical companies.

**Aqua-Pure** brand water filters are the choice of quality-conscious plumbing professionals, builders and specifying engineers. Today, **Aqua-Pure** water filters can be found in **MILLIONS** of homes around the world!
